ABOUT ME

I am a third-year Ph.D. student at INRIA (Paris, France) under the supervision of Marc Shoenauer and Alessandro Leite. At the **intersection of Causality and Machine Learning**, my current research project aims to improve decision-support tools with a specific interest in **robustness** and **uncertainty**. Having worked as a consultant for a year before starting my Ph.D. funded by this same company, my research is driven by concrete use cases and applications. My goal is to provide advice and knowledge in order to **democratize the use of causal reasoning in statistical analysis** for decision-making by providing tools to create value easily, sustainably, and fairly.

EXPERIENCE

- DATA SCIENTIST CONSULTANT** 2021-2022
Ekimetrics | Paris, France
- **Interpretability and Time Series:** Decomposition of marketing actions' uplifts with SHAP on predictions of time series revenues
 - **Few-shot Learning in NLP:** Use of semi-supervised methods for Aspect Based Sentiment Analysis applications
- DATA SCIENTIST INTERN** 2020
Schlumberger | Cambridge, UK
- Performed data-driven prognostics for **Survival Analysis**
 - Resulted in the deployment of the solution on more than 14 equipment
- DATA SCAN TOOL ENGINEER INTERN** 2019
Schlumberger | Paris, France
- Build a physical model of signal propagation in transmission lines
 - Applied Machine Learning algorithms to detect and locate failures simulated through the physical transmission line model
